CANON CAMERA COMPANY, INC.
TOKYO, JAPAN

The Canon Camera Models VI-T and VI-L made their debut on the market in September 1958. Compared to their predecessors, such as Models VT de luxe and VL, they have a greatly improved shutter mechanism and range-viewfinder.

Main features of the Canon Camera Models VI-T and VI-L follow.

- 1) High sensitivity exposure meter coupled to the shutter speed dial.
- 2) Single pivot, non-rotating shutter speed dial with a linear scale.
- 3) Stainless Steel Shutter Curtain.
- 4) Bright, accurate three-position range-viewfinder. The MG position especially, provides rangefinding with highest accuracy.

In addition to the features mentioned above, the two models are designed and manufactured with every care to provide easy operation and long-life.

In March, 1959 or some six months after the Canon Camera Models VI-T and VI-L made their debut, the Canon Model P or "Populaire" was released to the market as an economy model. The Model P is patterned after the Model VI-L with changes in the range-viewfinder and accessory clip portions of the camera body. An overall styling also underwent some change.

This is the changes made in the Model P:

- 1) The three-position magnification viewfinder was replaced with an "Albada" type range-viewfinder with masking frames for 35mm, 50mm and 100mm lenses.
- 2) The Automatic parallax correction device, which the VI-L has for accessory viewfinders, was removed.

This service manual contains diagrams and parts lists covering those of the three cameras which were manufactured in their initial period. Modifications and changes, which have been subsequently made, will be covered in supplements to this manual.

PARTS LIST for MODEL VIT

NOTICE. When ordering parts, please be sure to place an order with the EXPORT DEPARTMENT, Canon Camera Co., Inc., clearly stating NAME, BODY NUMBER, NOMENCLATURE, PART NUMBER, DESCRIPTION and QUANTITY needed.

Other explanatory notes regarding this parts list are as follows:

- a. When a single part number is used to denote a semi-assembly of parts, such a part number is shown as CU039 in the EXPLODED VIEWS. Such a part number is marked * (asterisk) in the PARTS LIST and further broken down in a corresponding column.
- b. When more than one piece of an identical part is used in a portion of the product, we indicate by multiplying the quantity to its part number as in C0032 D Ring x 2.
- c. When the description of a part is given in the form of two parts with a virgule in between, as in S4651 Screw C9004/CU035C which describes in the PARTS LIST, such a part S4651 in this example is used to connect the two parts to each other.
- d. The underlined parts are provided for the convenience of illustration and are not really available.

Section IV
PARTS LIST for MODEL VIL

NOTICE. When ordering parts, please be sure to place an order with the EXPORT DEPARTMENT, Canon Camera Co., Inc., clearly stating NAME, BODY NUMBER, NOMENCLATURE, PART NUMBER, DESCRIPTION and QUANTITY needed.

Other explanatory notes regarding this parts list are as follows:

- a. When a single part number is used to denote a semi-assembly of parts, such a part number is shown as CU036 in the EXPLODED VIEWS. Such a part number is marked * (asterisk) in the PARTS LIST and further broken down in a corresponding column.
- b. When more than one piece of an identical part is used in a portion of the product, we indicate by multiplying the quantity to its part number as in C0032 D Ring x 2.
- c. When the description of a part is given in the form of two parts with a virgule in between, as in S4651 Screw C9165/CU037C which describes in the PARTS LIST, such a part S4651 in this example is used to connect the two parts to each other.
- d. The underlined parts are provided for the convenience of illustration and are not really available.

PARTS LIST for MODEL P

NOTICE. When ordering parts, please be sure to place an order with the EXPORT DEPARTMENT, Canon Camera Co., Inc., clearly stating NAME, BODY NUMBER, NOMENCLATURE, PART NUMBER, DESCRIPTION and QUANTITY needed.

Other explanatory notes regarding this parts list are as follows:

- a. When a single part number is used to denote a semi-assembly of parts, such a part number is shown as CU036 in the EXPLODED VIEWS. Such a part number is marked * (asterisk) in the PARTS LIST and further broken down in a corresponding column.
- b. When more than one piece of an identical part is used in a portion of the product, we indicate by multiplying the quantity to its part number as in C0032 D Ring x 2.
- c. When the description of a part is given in the form of two parts with a virgule in between, as in C4651 Screw C9162/CU038C which describes in the PARTS LIST, such a part C4651 in this example is used to connect the two parts to each other.
- d. The underlined parts are provided for the convenience of illustration and are not really available.

CONTENTSPAGE OF PARTS LIST
